Electric Vehicles in India

Findings

- ✓ Verified: The electric vehicle industry in India is slowly growing. The central and state governments have implemented schemes and incentives to promote electric
- ✓ Verified: # Electric Vehicle Industry in India: Growth, Policy & Market Trends. The Indian EV market is forecasted to expand from US\$ 3.21 billion in 2022 to US\$ 113.99 billion by 2029, with a 66.52% CAGR. *As of December 2025, India's EV charging network has expanded rapidly, growing rapidly from FY22 to Q3 FY25. It aims for a stock of 25,000 electric four-wheelers by 2026, with battery electric vehicles (BEVs) comprising 25% of all vehicle registrations in that year. Additionally, the policy targets 1,00,000 electric two-wheelers and 75,000 electric three-wheelers in stock by 2026. *Opportunity for the EV sector lies with the establishment of 1.32 million charging stations in India by 2030, requiring 4,00,000 installations yearly. The company is strengthening its position in the electric vehicle market with a US\$1.5 billion investment in an Indian battery gigafactory, scheduled to commence production in 2026. *India's auto component industry will see Rs. 25,000-30,000 crore (US\$ 2.89-3.46 billion) investment in FY26 for capacity expansion and EV parts, after Rs. 15,000-20,000 crore (US\$ 1.73-2.31 billion) in FY25, says ICRA.
- ✓ Verified: # Electric Vehicles. This mission is critical for India to reduce fossil fuel consumption and mitigate emissions by facilitating the production of Electric Vehicles (EVs) economically. The Electric Vehicle (EV) Mission was approved in the 1st Meeting of the PM-STIAC held on 9th October, 2018. The 'Electric Vehicles mission of the PM-STIAC aims to develop vehicle sub-systems and components specific to Indian requirements. In India current automobile market is dominated by fossil fuel-based vehicles, the Indian government has set up ambitious targets and created National missions and programs to ensure that electric vehicles replace fossil fuel-based vehicles as the primary mode of transport. The FAME-II and Advanced Chemistry Cell PLI Schemes provide incentives to the customers for purchasing electric vehicles, and incentives to the manufacturers for manufacturing electric vehicles, batteries, and storage systems. Ajay Kumar Sood, Principal Scientific Adviser to the Government of India, releasing the report on India's Priority Corridors for Zero-Emission Trucking on 9th May 2025. Technical Roadmap For Deployment Of Zero-Emission Trucking In India.
